Scanned from a Xerox Multifunction Printer.pdf;

Neal,

Here are the maps of drinking water sources and classroom sinks at the three schools you asked about. I would again stress the importance of not releasing these maps publicly due to potential for them falling into the hands of someone who wants to cause trouble.

On these, I have circled in blue all the drinking water sources. I have highlighted in yellow the fixtures that failed testing. You will note two things. First, there is only one fixture that falls into both categories and it is disabled. Second, every classroom has access to good drinking water within a matter of steps outside the room.

So, besides her mapping Bryant, which has zero failures, as the biggest red dot on the 10ppb map, Rachel has also apparently included these three schools in her 53% when they have no drinking water sources that fail to meet our standards. I hope you begin to understand my frustration with your choice to rely on her deeply flawed analysis and her unwillingness to make the corrections she agreed were needed a year ago.

Richard
